When it comes to lockers, security and reliability go hand-in-hand.

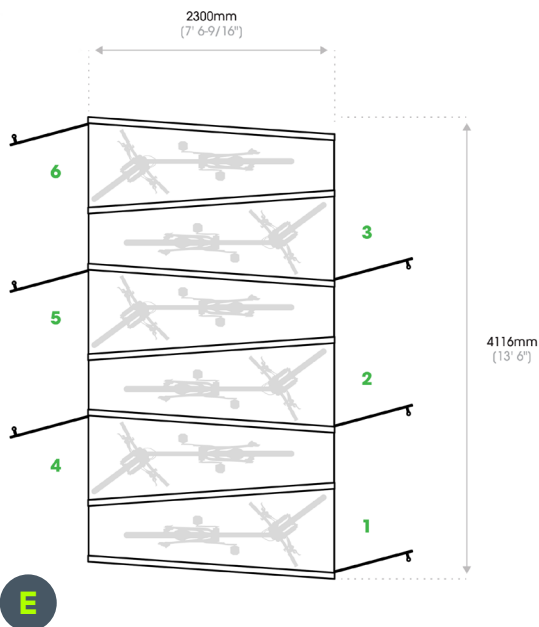

Far too often, lockers marketed as secure don't last. Or even worse, those that do last are unsafe for use.

That's why Bikeep's bike lockers are remarkable. Combining durability with excellent theft prevention and offering additional innovative features such as:

- **Fast and convenient shared usage with RFID cards and mobile apps.**
- **Solar or battery-powered stations enable easy installs.**
- **Simple access control and abandoned bike identification.**

PRODUCT GUIDE: A / Secure locking B / Solid metal construction C / Thin perforated sheets between modules D / Long-lasting galvanized & powder coated structure E / Flexible modular design

● ●●● OPEN NEW HORIZONS

Your commuters have entered the 21st century. So should your lockers.

Make **your Bikeep** a core part of your business. Adopt a **beautiful custom design** for your lockers with new business models and revenue streams:

- **Allow advanced reservations for an extra fee or only for premium users.**
- **Rent or borrow bikes with online control over individual lockers.**
- **Bikeep not only stores the bike but can offer e-bike recharging as well.**

HOW IT WORKS: You can unlock your Bikeep locker with a mobile app; a RFID card; a keyed lock or a numeric lock
